Description

Stackable crate with Euro norm size of 400 x 300 mm. The stackable crate is completely closed, including the handles. Made of food-grade plastic, making it highly suitable for use in the food industry. This stackable crate is widely used in event catering and rental as, for example, a plate crate. Plates with a diameter of up to 155 mm can be placed vertically in the crate. The stackable crate is easy to handle with the integrated handles on both short sides. Due to the Euro norm dimensions, this stackable crate can be perfectly combined with all other Euro norm stackable crates, as well as with standardized pallets, roll containers, and mobile bases.
