Description

Plastic ballot box 400 x 300 x H 295 mm with suitcase handles, cylinder lock, and mailbox flap in the lid. Ideal as a transport box for the transportation of postal votes. The transport box has a capacity of 26 liters. The ballot box is closed with a lid equipped with a lock. The lid has a mailbox flap with a slot in the middle through which the ballot papers and postal votes can be inserted into the box. The contents of the ballot box are accessible after unlocking the hinged lid. The lid can also be additionally sealed on the short sides. The size of the slot (280x32 mm - w x h) is large enough for the intake of ballot papers (folded approximately 70 mm wide) and postal votes (unfolded 162 mm). The ballot box has a smooth bottom, two suitcase handles, and hinge reinforcements for the hinged lid. Transoplast's ballot boxes and transport boxes are stackable and easy to move with the handles on the short sides. Upon request, we supply the ballot boxes with logo and/or text printing. Inquire about the possibilities.
