Artikelnummer: 4.401.300.623 Bedrukking mogelijk

BIG BOX plastic palletbox - 1200 x 1000 mm - 3 runners - blue

Product specificaties

Uitwendig (LxBxH)	1200 × 1000 × 790 mm
Inwendig (LxBxH)	1110 × 910 × 610 mm
Capacity	670 liter
Sidewalls	Closed
Material	HDPE
Article number	4.401.300.623
Weight (kg)	44,51 kg
Temperature range	-30°C to +70°C
Color	Blue
Bottom	Closed, reinforced
Colorcode	RAL 5002
Max. load capacity per box	500 kg
Max. static stacking load	4500 kg
Max. dynamic stacking load	1000 kg

Eigenschappen

- **With convex, projecting walls for extra internal volume**
- **With a 1" outlet provision on one short and one long side**
- **With a 2" outlet provision on one short and one long side**

Omschrijving

This pallet box is a durable and versatile storage system, designed to meet the strict requirements of the food industry. It has a sturdy construction with dimensions of 1200 x 1000 x 790 mm and a capacity of 670 liters. This large box is made of high-quality HDPE plastic and is available in a variety of vivid colors such as blue, gray, red, green, orange, and yellow, facilitating identification in complex logistical environments.

This closed pallet box is popular in the meat industry, both for storage and as transport packaging. Due to its impact-resistant and durable properties, it is also highly sought after in the recycling sector. The box has a wide range of applications, such as an environmental box, drip pan, catch basin, storage bin, and transport bin. Additionally, it is also used as a water trough or quarantine bin.

A notable feature of this BIG BOX pallet box is its construction with three skids, which enhances durability and stability, while the closed sidewalls and reinforced bottom optimally protect the contents. The box is equipped with both a 1-inch and a 2-inch drain facility on one short and one long side, allowing for quick and efficient emptying without the need to move the box.

The convex, outward-facing wall panels not only contribute to structural integrity but also optimize the internal volume of the box. This design choice enables the pallet box to hold up to 10% more content than conventional pallet boxes with straight sides, which is extremely valuable for users who need maximum efficiency in storage and transport.
