- **The cutlery insert basket is made with eight subdivisions for washing upright**
- **Two 50.BKS.20.5 cutlery insert baskets fit into a 50.NK.100 universal basket**

Description

Cutlery insert basket (445 x 210 x H 140/260 mm) with two large handles and eight compartments for cutlery. The cutlery is washed standing up in the insert basket. The insert basket is made from one piece and equipped with handles. The baskets and cups are so finely meshed that the cutlery cannot fall through, and the open construction ensures a perfect rinsing result. The high handles protect your hands when gripping the cutlery basket against sharp utensil parts and also ensure hygienic handling. The cutlery insert basket is ideal for use in combination with our universal baskets; two insert baskets fit side by side in them.
