

Fillet box 15 kg - with drain holes

Product specifications

Uitwendig (LxBxH)	600 x 400 x 155 mm
Capacity	20 liter liter
Handles	Open
Sidewalls	Closed
Material	HDPE
Article number	83640300
Weight (kg)	1,6 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Blue
Bottom	Sloping base with four drain holes and sideways outlet in top rim

Features

Filleting crates are stackable and nestable.

The nesting principle saves up to 70% of space.

Features a domed bottom construction with 4 drainage holes and lateral discharge in the top edge.

Sturdy design for trouble-free and long-lasting use.

Description

Filleting crate in Euro standard size of 600 x 400 mm with a height of 155 mm. Due to the Euro standard sizing, the filleting crate seamlessly combines with plastic pallets, bases, and roll containers. The filleting crate is equipped with a drainage system. Drippings and slime are efficiently drained through the drainage holes in the four corners of the base, preventing these substances from reaching the crate below. This enhances the quality, color, and freshness of the fish. The filleting crates are nestable and stackable, allowing significant space savings during empty storage and returns. The filleting crate has a capacity of 20 liters and a load capacity of 15 kg.
