- **With sloped base construction and water drain outlet**
- **Fish boxes are stackable and nestable**
- **With arrow marking as visual aid to stacking and nesting**
- **Up to 65% of space is saved by the fish boxes' nesting principle**

Description

Fish crate with drainage holes sized at 800 x 450 x H190 mm. For safe and hygienic storage and distribution of fresh fish. The fish crate is equipped with a drainage system. Drainage holes are situated in the closed bottom at the four corners, allowing for the removal of meltwater and slime, preventing them from reaching the fish crate below. This ensures optimal quality, freshness, and color of the fish.

The stackable and nestable fish crate is made of food-grade plastic. Nesting empty fish crates achieves up to 73% space savings. Arrow markings on the upper edge of the fish crate indicate how it can be nested. The crate has a capacity of 35 liters and a carrying capacity of 20 kg. The fish crates are equipped with a provision for transponders. RFID chips are available upon request. For more information about these transponders, please contact our product specialists.
