- **With sloped base construction and water drain outlet**
- **Fish boxes are stackable and nestable**
- **With arrow marking as visual aid to stacking and nesting**
- **Up to 65% of space is saved by the fish boxes' nesting principle**

Description

Stackable and nestable fish crate with drainage holes in size 800 x 450 x H270 mm. For safe and hygienic storage and distribution of fresh fish. The closed bottom of the fish crate has drainage holes located in the four corners. Meltwater and slime are drained, preventing them from reaching the fish crate below. This ensures the quality, freshness, and color of the fish.
The stackable and nestable fish crate is made of food-grade plastic. When nesting empty fish crates, up to 65% space savings can be achieved. The arrow marking on the top edge of the fish crate indicates how the crate can be nested. The fish crate has a capacity of 60 liters and a carrying capacity of 40 kg. The fish crates are equipped with a provision for transponders. RFID chips are available upon request. For more information about these transponders, please contact our product specialists.
