Article number: 81611911

FMK mortar tub - 200 liter - Red

Product specifications

Uitwendig (LxBxH)	990 × 665 × 490 mm
Inwendig (LxBxH)	910 × 585 × 480 mm
Capacity	200 liter
Color	Red
Handles	Two steel grab handles, hinged
Sidewalls	Closed
Material	LDPE
Article number	81611911
Weight (kg)	17 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Bottom	Closed, reinforced
Pallet quantity	25

Features

- **FMK mortar tub may be hoisted up thanks to a robust steel frame with lifting loops**
- **The FMK mortar tub is TÜV certified for 5 years**
- **With calibrated contents scale (200 L)**
- **Extremely impact and chip resistant plastic mortar tub**

Description

A plastic mortar tub of the FMK type with a capacity of 200 liters is a reliable tool on construction sites for mixing and transporting mortar. Made of high-quality plastic that withstands heavy loads and impacts, this tub provides durability and reliability for daily use.
The sturdy construction of this tub features a reinforced steel rim, making it resistant to intensive use and ensuring extra stability while mixing materials. Thanks to the crane brackets, the tub is easily lifted and moved using lifting equipment.
The design of this mortar tub focuses on efficiency on the construction site. With a capacity of 200 liters, there is ample space to mix and transport a significant amount of mortar, making it an essential part of the construction process.
The FMK mortar tub meets strict safety standards and comes with a GS certificate for verified safety, providing peace of mind and confidence when used at various construction sites.
Overall, the plastic mortar tub of the FMK type with a 200-liter capacity offers a combination of durability, ease of use, and safety, making it an essential tool for professionals in the construction sector.
