## Description

Attention before placing an order!
The dimensions of the glass determine the choice of crate. Measure the height of the glass and the diameter at its widest point. Euro standard crate for rinsing, storing, and transporting glassware. The glass crate with compartments accommodates 33 glasses with a maximum height of 103 mm and a maximum Ø of 75 mm. The dimensions of the glassware determine the choice for the right glass crate. If the glass is much lower than 103 mm or much narrower than Ø 75 mm, this crate is not suitable. Check the other glass crates in this series for a better fitting crate. This crate has Euro standard dimensions of 600 x 400 mm and is 130 mm high. The glass crate accommodates 33 glasses. The glassware is completely clean after washing in the glass crate. Due to the coarse perforated side walls and bottom, the rinsing water and cleaning agent have good access to the glassware. This achieves a clean washing result. The glasses do not touch each other, ensuring optimal protection during storage, transport, and cleaning in dishwashers. The glass crates have Euro standard dimensions, making them perfect for combining with other plate bins and stacking crates with Euro standard measurements. Furthermore, the glass crates can be stacked without space loss on standardized frames, roll containers, and pallets.
