Product specifications

Uitwendig (LxBxH)	600 × 400 × 154 mm
Inwendig (LxBxH)	568 × 368 × 140 mm
Capacity	29.3 liter
Color	Grey
Handles	Open (four openings)
Sidewalls	Perforated
Material	HDPE
Article number	30.115.5x8.UO
Weight (kg)	2,5 kg
Temperature range	-40°C to +70°C
Bottom	Perforated, reinforced
Maximum glass height	125
Maximum Ø glass	65
Pallet quantity	60

Features

The choice of crate is determined by the glass dimensions - measure the height and diameter at the widest point.

Plastic crate with a double compartment for 40 glasses, measuring 600x400 mm and a height of 154 mm.

Suitable for cleaning, storage, and transportation of glassware and tableware with a maximum glass height of 125 mm and a maximum Ø of 65 mm.

The crate's layout is determined by the content - choose another crate if the glass is taller than 125 mm or wider than Ø 65 mm.

The crate offers 40 individual spots for glasses, isolating each glass to prevent scratches and breakage during cleaning, storage, and transportation.

Benefits of this crate include the double compartment with upper and lower compartments that provide optimal protection for glassware with a base, effectively supporting the most vulnerable part, the base.

Also suitable for cups or tumbler glasses; roughly perforated side walls and bottom ensure rinse water and cleaning agents have easy access to the content, resulting in completely clean glassware after cleaning.

The glass crates are stackable and compatible with other plate bins and stacking crates with Euro-standard dimensions. They can be stored and transported without space loss on standardized supports, roller containers, and pallets.

Description

Pay attention before ordering!

The glass dimensions determine the choice of the crate. Measure the glass height and the diameter at the widest point.

Plastic crate with a double compartment for 40 glasses. The glass crate measures 600x400 mm and has a height of 154 mm. Suitable for cleaning, storage, and transport of glassware and tableware with a maximum glass height of 125 mm and a maximum Ø of 65 mm. The size and layout of the crate are determined by the contents. If the glass is taller than 125 mm or wider than Ø 65 mm, choose another glass crate in this series. We are happy to provide advice.

The glass crate with compartmentalization offers 40 individual spots for glasses. The glasses do not touch each other, ensuring optimal protection against scratches and breakage during cleaning, storage, and transport. The advantage of this glass crate is the double compartmentalization. The glass crate has upper and lower compartmentalization, providing optimal protection for glassware with a base. The most vulnerable part of a glass, the base, is well supported in this glass crate. If you need to transport cups or tumbler glasses, a glass crate with a single compartment is also suitable. The glass crate has coarse perforated side walls and bottom, allowing rinse water and cleaning agents to easily reach the crate's contents. Glassware is completely clean after washing in the glass crate.

The glass crates are stackable and perfectly combinable with other plate racks and stacking crates with Euronorm dimensions. Additionally, the glass crates can be stored and transported without space loss on standardized bases, rolling containers, and pallets. For more information, contact our product advisors.
