Bottom	Perforated, reinforced
European Article Number	7,4249E+12
Colorcode	RAL 7040
Pallet quantity	44

Features

Also available in our webshop as a complete basket including compartmentalization in various designs.

Description

Glass crate (600 x 400 x H 198 mm - 38.3 liters) from the BASIC glass crate series. Highly suitable for transporting and rinsing glasses. Maximum glass height: 169 mm. This sturdy glass crate can be equipped with a bottom compartmentalization (O) and a top compartmentalization (B). For available compartmentalizations, see 'Accessories'. The food-grade crate has a coarsely perforated, reinforced bottom and coarsely perforated side walls, providing good access for rinse water and cleaning agents to the cups or glasses. With compartmentalization, the BASIC glass crates are ideal for a dual purpose: as a rinsing crate and as a storage crate. Equipped with 4 open handles for optimal handling. The BASIC glass crates stack easily and very stably with our Euro norm stackable bins and have the exact same color as the bins from the SOLID LINE. This modern and robust crate therefore perfectly complements our Euro norm bins and rolling containers, and is also perfectly suitable for universal use.
