Description

Nestable plastic pallet 800 x 600 mm. Designed with six legs. The lightweight version in regenerated material is suitable for goods export, for display applications, as well as for storing packaged food or, for example, tires. In their empty state, the pallets can be efficiently nested, saving space. The pallet is lightweight, impact-resistant, and stable. Exporting on a plastic pallet is more hygienic than on a wooden pallet, as plastic pallets do not absorb moisture, pests, or bacteria. A pallet certificate to IPPC countries is also unnecessary.
