Description

A true all-rounder! This plastic stacking container with a smooth bottom has a practical container height of 220 mm and can be filled right up to the edge. Thanks to the closed handles, you can make optimal use of the container's volume. With a matching stacking lid, the contents remain dust-free and clean. An ideal stacking container for use in the food industry, in the warehouse, or just for general use. Due to the standardized dimensions, the stacking container can be stacked with all other Euro containers and is also perfectly combinable with standardized pallets, roll containers, and mobile bases.
