Description

A true all-rounder! This plastic stacking crate with a smooth bottom has a practical crate height of 220 mm and can be filled right up to the edge. Thanks to the closed handles, you can make optimal use of the crate's volume. With a matching stacking lid, the contents remain dust-free and clean. An ideal stacking crate for use in the food industry, in the warehouse, or simply for general use. Due to the standardized dimensions, the stacking crate can be stacked with all other Euro crates and is also perfectly combinable with standardized pallets, roll containers, and mobile bases.
