Description

Stackable container in black, made of food-grade plastic with Euro norm bottom dimensions of 600 x 400 mm. The bottom, walls, and handles are all closed, enabling the full utilization of the content up to the top edge. The black stackable container has a reinforced lattice bottom, making it highly suitable for applications involving heavy loads. Due to its Euro norm size, the black stackable container can be perfectly combined with other Euro norm stackable containers, as well as standardized pallets, roll containers, and dollies. This black stackable container also perfectly matches in color with our other black stackable containers and roll containers.
