Description

Stackable container in Euro standard size 400 x 300 mm. The stackable container is entirely closed. The handles are also sealed. Made of food-grade plastic, making it highly suitable for application in the food sector. This stackable container is widely used in event catering and rental services, serving as, among other things, a plate tray. Plates with a diameter of up to 155 mm can be vertically placed in the container. The stackable container is easy to handle with integrated handles on both short sides. Thanks to the Euro standard sizing, this stackable container perfectly combines with all other Euro standard stackable containers, as well as standardized pallets, roll containers, and mobile bases.
