Description

Lidded container made of food-grade plastic. Euro container format 400 x 300 mm. The lidded container is composed of a stacking container with a hinged lid and two snap-slide fasteners. When open, the lid is detachable. Thanks to its standardized dimensions, the container seamlessly combines with other Euro stacking containers without wasted space, as well as standardized pallets, roll cages, and dollies. The container is also stackable with its lid. The snap-slide fasteners ensure secure closure of the lidded container while being easily opened. The lockable lid prevents loss, damage, or contamination of goods during transportation.
