Description

The lid container 600 x 400 x H190 mm is a Euro norm stacking container equipped with a hinged lid and snap-lock closures. The lid container features a smooth, closed bottom and closed sidewalls. The plastic lid is detachable when in the open position. With the two snap-lock closures, the lid is easy to open. The lockable lid prevents cargo from getting lost, damaged, or contaminated during transport. Due to the standardized dimensions, the lid container can be stacked with other Euro containers, both with and without lids. Additionally, the lid container can be perfectly combined without losing space with standardized pallets, bases, and roll containers. We supply foam interiors, seals, and label holders as accessories for the lid containers.
