## Description

Stackable crate 600 x 400 mm made of food-grade plastic. A true powerhouse! Equipped with coarsely perforated side walls and bottom for optimal ventilation of the contents. The stackable crate is highly suitable as a bread crate in bakeries, but also excellent for use in the (industrial) food sector, textile industry, and hospitality. The bottom and side walls are reinforced. Even under heavy loads and extreme conditions, the bottom's deformation is nearly negligible. Due to its construction and material composition, it's a reliable crate for many applications. The stackable crate is versatile, partly due to its standardized dimensions. The 600 x 400 mm stackable crate perfectly fits with other Euro standard stackable bins and crates, as well as with standardized pallets, roll containers, and mobile bases.
