Features

Food-safe bread crate / stacking crate

Ideal for bakeries

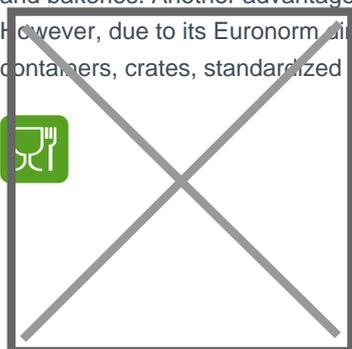

Equipped with reinforced side walls and bottom

Features coarse perforated walls

Has four open handles

Description

Plastic stacking crate in Euronorm format 600 x 400 mm with a height including a reinforced base of 349 mm. Equipped with coarsely perforated side walls and base. With two open handles for practical handling. Due to its stable construction and Euronorm dimensions, the food-safe stacking crate is highly suitable for applications in the (industrial) food sector, textile industry, hospitality, and bakeries. Another advantage for these industries is the good ventilation of the contents thanks to the perforated walls and base. However, due to its Euronorm dimensions, the stacking crate is universally applicable and perfectly compatible with Euronorm containers, crates, standardized pallets, mobile bases, and roll cages.
