Description

Plastic stacking crate with lid light in Euro norm size 600 x 400 x H235 mm. The applications of these crates are versatile and can range from use in the food industry, for example, for transporting vegetables and fruits, to warehouses for storage and distribution of goods. The perforated bottom with light rib reinforcement ensures that products remain well-ventilated, making them highly suitable for use in controlled environments. Although it is not possible to add compartment dividers to the light crates, there is plenty of space to store products
