Description

Stackable-nestable container with a base size of 800 x 400 mm in green color and with a smooth bottom. The green container is rotatable-stackable. This means that the green container can be stacked, but also nested when rotated 180 degrees. This saves a lot of space when the container is empty. This green stackable-nestable container is perfect for transporting valuable chafing dishes for rental purposes. In this stackable-nestable container, the chafing dishes remain well-protected against damage. The smooth walls and bottom make the container easy to clean and highly hygienic. Thanks to the bowl handles, the content of the green stackable-nestable container can be optimally utilized. The containers can be stacked with the chafing dishes and nested when empty. The containers provide excellent protection for often expensive and delicate trays: therefore, they are indispensable for the hospitality industry, professional caterers, and larger hotels!
