Tension strap with one hook

Product specifications

Uitwendig (LxBxH)	450 × 40 mm
Color	Black
Material	Rubber
Article number	99.454.502

Features

The rubber tension strap, measuring 450 x 40 mm, is a reliable tool for various applications. Equipped with a sturdy steel hook at one end, this strap provides a solid attachment for diverse loads. The steel hook ensures a secure grip on various surfaces, keeping the load firmly in place during transportation or storage. Additionally, the strap features a practical plastic tension handle at the other end. This ergonomically designed handle makes it easy to tighten and lock the strap, achieving optimal tension for safe transport of goods. The combination of the steel hook and the plastic tension handle offers a user-friendly solution for securing loads on trucks, trailers, or in warehouses.

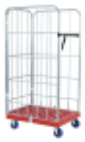

Description

Rubber strap for roll containers. With metal plate hook and plate eye, and a plastic tension handle. Straps are used for securing 2-sided and 3-sided roll containers. Size 485 x 40 mm.
