Description

Triple plastic pallet box with funnel base (1200 x 1000 x H 1790 mm - 1500 liters). A triple plastic pallet box equipped with a bottom outlet in the center of the base of the pallet box. In the lower part of the pallet box, a tapered hopper base is welded with an opening of 120x120mm. This opening is closed by means of a slide valve that can be operated from the short side, optionally from the long side. The SB3 with its smooth, funnel-shaped interior is ideal for the controlled dosing of dry bulk materials, such as granulate, seeds, grain, dry animal feeds, pellets and other small components.
